

Messina - Catania track doubling: (between Giampileri – Fiumefreddo)

Description:

Track doubling along a modified route is planned for between Fiumefreddo and Giampileri stations, over an extension of approx. 42km; building Fiumefreddo and S.Alessio - S.Teresa stations, as of four new stops (Alcantara, Taormina, Nizza - Alì and Itala - Scaletta), besides regenerating Letojanni station, as well as the interchange point with the current Letojanni station, where metropolitan trains serving the future link from Catania Fontanarossa Airport in Taormina will wait in the sidings. Following the publication of the new decree on railway tunnel safety, the preliminary project is to be submitted to assess its compliance with the safety aims.
