

# ***Professional Profile***

## **ANDREA NARDINOCCHI**

24 June 1961

Graduated in Electronic Engineering from the University of Pisa, he began his career in Ferrovie dello Stato Italiane Group in 1994 as a designer for automatic train control systems.

In 1996 he joined Italferr, dealing with major projects through participation, in Brussels, in the drafting of the functional specifications of the ERTMS interoperable signaling system on a European scale. Preliminary and executive design of the signaling system on the High Speed lines of the national network.

Since 2002 he has held positions of increasing responsibility, first at the head of the High Speed Technological Systems Organizational Unit, later as Head of Coordination of Technological Projects and in 2011 as Head of the Scientific Department.

From 2012 to 2021, Eng. Nardinocchi assumes the position of Technical Director, ensuring the production of infrastructural and technological projects and coordinating over 700 engineers, geologists and technical experts.

In December 2021 he has been called to lead Italferr as Chief Executive Officer and Managing Director.
